

# Cell Culture Facility New SOPs

We are open! But we want everyone to stay safe so please follow these simple SOPs:

We are using pedestal signs in the lab to communicate our occupancy limits.

**You must wear a mask at all times in the facility!**

## **Media and Supplies:**

You can continue to check out media and supplies using the regular method but we suggest you bring your own pen. You can also send us an email with your order and we will prepare it, check everything out and leave it for you on our cart near the front door. Please have your order in early morning for same day orders.

## **Mammalian cell pick up:**

We have moved the location of mammalian cell order pickup to incubator #2 close to the CO2 canisters so we can maintain social distancing. Only staff are allowed to use the hoods in the main lab. We would appreciate it if you could bring your own secondary containers for taking away your cells.

## **Insect cell users:**

We are only allowed to use 1 of the hoods in the new lab for this phase of reopening. There is now an online calendar system on the insect cell order form where you can sign up for time. You will not be able to use the hood if you don't sign up on the calendar. Please wipe down the hoods, microscopes etc before and after you touch them.
